Painting instructions for clear fixtures (tubs, toilets, sinks, hot tubs, tile)

Use acrylic paint, flat or glossy, it will always show through as glossy with a scratch resistant finish.

Brush or spray paint on the under side(reverse), brush strokes won't show on good side.

To make designs, (flowers, checkers, speckles, etc.):

1. Paint design in layers (ie: paint centre of flower first, then petals, leaves, and so on), let each layer dry.
2. Paint the solid (background) colour over the painted (dried) design, let it dry.
3. For a realistic drain, use a CIRKIT eyelet or dab gold/silver paint in the drain.
4. Now finish off by adding MB S faucets in gold or silver, use Weldbond or CA glues.
5. To glue fixture in place: use Weldbond or silicone . Do not use glues that will attack the plastic.

Clean off any glue residue before it dries.

The above method applies to all MBS clear fixtures including MBS tile floors.
